

# 2000 SERIES

## DESCRIPTION

The 2000 series is a 400mm x 170mm jaw action crusher that has the capability of crushing a full UK kerbstone in approximately 60 seconds. Instant hydraulic adjustable jaws allow output product sizes to range from 20mm up to 80mm.

Dust suppression is fitted as standard, by means of fine water spray nozzles utilising standard domestic hose pressure. These crushers are very popular with landscape gardeners, small builders, developers and the agricultural sector. The 2000 series crusher can be powered by the use of hydraulic powerpacks or any auxiliary hydraulic supply from a tractor or any other similar plant. Electric versions are also available.

Purchasing a 2000 series for small scale crushing is a very cost-effective method of avoiding large muck away bills and bought in hardcore costs. Simply move the crusher into position, plug in the hydraulic/electric supply and you are ready to crush in less than 5 minutes.

The 2000 series makes light work of reinforced concrete, brick, porcelain, glass and other aggregate type products.

## STANDARD FEATURES

- Jaw aperture of 400mm x 170mm
- Average product size 20mm to 80mm
- Additional product sizes on request
- Choice of hydraulic or electrical powered
- Output can be 6-8 tonnes per hour
- No excavator needed to load the crusher
- CE marked

## DIMENSIONS

- Length: 1300mm
- Width: 960mm
- Loading Height: 1500mm
