

5000 PLUS SERIES

DESCRIPTION

The 5000 Plus is similar to the standard 5000 but with the added feature of a vibrating feeder. This addition is hydraulically driven

and operated by the remote-control handset.

The 5000 series is a jaw action crusher that is capable of crushing a full UK kerbstone in approximately 45 seconds. Instant hydraulic adjustable jaws allow output product sizes to range from 20mm up to 100mm. Being only 1663mm wide, the 5000 series can enter sites where access and space are restricted. Dust suppression is fitted as standard, by means of fine water spray nozzles utilising standard domestic hose pressure.

This crusher is very popular with civil engineering companies wanting to crush onsite, or skip companies looking to reduce their liabilities to landfill.

The 5000 series makes light work of reinforced concrete, brick, porcelain and other aggregate type products. Crushing with the 5000 series can save thousands of pounds on muck away and bought in backfill.

Using the wireless remote-control system crushing with a 5000 series can be a one-man operation. The 5000 series cannot be matched for its reliability and performance by any other product on the market.

STANDARD FEATURES

- Jaw aperture of 500mm x 250mm
- Average product size 20mm to 100mm
- Additional product sizes on request
- Kubota 25HP 4 cylinder water cooled diesel engine complies with EPA Tier 4 emissions
- Fuel consumption is approximately 5 litres per hour
- Output can be up to 15tonnes – 20tonnes per hour (dependent on material size and operating conditions)
- Wireless remote-control system for all functions
- Excavator loaded
- Vibrating feeder
- CE marked

DIMENSIONS

- Length: 5100mm
- Width: 1663mm
- Loading Height: 2000mm
- Weight: 3056kg
